

Supporting Your French Immersion Student During Remote Learning

TEACHERS TEACH, PARENTS FACILITATE

Let your child's teacher guide them through the curriculum and their learning. Your job is to support them and facilitate their learning. When help is needed reach out to the teacher or the school.

THIS PERIOD OF REMOTE LEARNING IS NOT FOREVER

Your children have been learning French since Kindergarten. All they need is your support, encouragement and resources like websites that support reading in French. Check out our website for an extensive list: [Click Here](#)

LITERACY IS LITERACY AND NUMERACY IS NUMERACY

Support your child in the language spoken at home. Practice math! Learn the functions and the language will follow. You teach three plus three equals six and their teacher will teach them trois plus trois égale six.

ALL OF THE REASONS/ADVANTAGES FOR HAVING YOUR CHILD IN FRENCH IMMERSION STILL EXIST AND WILL NOT CHANGE

Now more than ever children need the advantage that French will give them. Job opportunities, excellent communication skills, problem solving and cultural intelligence to name only a few.

CHILDREN WILL CONTINUE TO BE SUCCESSFUL AT THEIR GRADE LEVEL

When in-class school resumes, students will be supported to ensure that they are at their grade level.

BUILDING RESILIENCY

Your child is working hard to learn another language no matter what grade they are currently in. Celebrate this! Using resources and supports, children will build their resiliency continuing their bilingual journey even in a remote learning environment. Share in this experience with them!
